

FOR IMMEDIATE RELEASE: **JUNE 2007**

EXTEX FURNISHING FABRICS: WEATHER-WISE

Marina Mill introduces **OUTLINE**,
the newest addition to the EXTEX range of outdoor furnishing fabrics.

Practicality is no excuse for bad taste! That's what Marina Mill is stating unreservedly with the introduction of **OUTLINE**, its fabulous new outdoor furnishing fabric manufactured with practicality in mind but design coming straight from the heart.

Marina Mill, a British company creating fantastic textiles for over 40 years, realises that the marine industry needs an exterior fabric that is both practical and gorgeous, and that there needn't be a trade-off between the two. The furnishing fabric gracing a yacht's deck should be functional and hard-wearing, able to cope with anything an adventurous captain or owner throws at it. But the fabrics should also be soft, glamorous and a pleasure to sit on. The industry demands it, and Marina Mill keeps offering the solution!

Outline is the newest addition to the **EXTEX** range of exterior fabrics designed and produced by Marina Mill and enthusiastically adopted by the yachting industry. EXTEX Outline is a dual-coloured, fine-ribbed chenille. Available in 21 luscious pairings, Outline coordinates with the 34 EXTEX Mull shades already available (Mull, the original EXTEX fabric, is a solid-coloured chenille).

The EXTEX range is loved by yacht designers and owners the world over; the fabrics are not only supremely practical - impervious to both salt & chlorinated water, machine washable, dry-cleanable, light-fast and Teflon-coated – they are fantastically sophisticated as well! Combining plush chenille and high performance yarns, Mull and Outline are the first exterior fabrics with a desirability factor.

Able to cope with the harsh realities of yachting life while still being gorgeous and glamorous... now that's weather wise!!!

EXTEX (Mull & Outline) is available exclusively through Marina Mill and fine designer showrooms worldwide. Price on application.
