YACHT LINER INC. YACHT TRANSPORT

Yacht Liner Inc. is a newly created lift-on lift-off yacht transport company, which currently offers service to and from Florida, Italy, Greece and Turkey. Resulting from a partnership between French yachting group Couach SA and CEO Captain Jean-Paul Charpentier, Yacht Liner began service last winter with the vessel *Confidence*. The company, which is headquartered in the UAE, has recently announced it will be expanding its services thanks to the addition of two new vessels, *Pacific* and *Prosperity* due to begin operations at the end of the year. The expanded fleet will allow Yacht Liner to offer monthly transatlantic service to and from Mediterranean ports.

HAZE, PURPLE IS JUST ONE COLOR

Britain's Keith and Stephanie Rawkins' success dates back to the Beatle mania-inspired mod fabrics they sold to London and Paris couturiers. Today they design fashionable outdoor fabrics for the yachting industry under the Extex brand name. At the 2008 Monaco Yacht Show this fall, they introduced Haze, a fabric produced with a special double-color weave technique that allows it to change color depending on the type and angle of light. Extex outdoor fabrics are available through Marina Mill.
